

PRODUCT DATA SHEET

lab0019 Anti-Dog IgG (H+L), Biotin conjugate antibody

Product specifications

Immunogen	IgG(H+L)		
Form	F(ab') ₂ fragments	Target	dog
Raised in	Rabbit	Labelling	Biotin
Conjugate properties	The avidin-biotin system is a signal amplification system that allows the detection of quantities of antigens that are too small to be detected by direct enzymatic or fluorescent systems. Biotin labelled antibodies allow label changes and the use of multiple labels. Biotin-labelled antibodies have a long storage life. Moreover, by its small size, the biotin has a negligible effect on the biological activity of proteins. The presence of endogenous biotin could however, increase background.		
Applications	The F(ab') ₂ is bivalent fragments of immunoglobulins, i.e. including two sites for the fixation of the antigen. They are prepared by enzymatic digestion (pepsin). Like our others antibodies, they are purified by affinity chromatography and are thus particularly specific. F(ab') ₂ fragments have certain advantages with respect to the entire antibodies in flow cytometry, immuno-histochemistry and immuno-cytology. On the one hand their specificity is increased since they can no longer be bound in a non-specific way by their Fc part as entire Ig's are. On the other hand their use also increases the sensitivity of the technique. In fact, their small size enhances their penetration into tissues and cells as well as their availability for the antigens (particularly for Fab). Finally, conjugated Fab's have a label/antigenic ratio that is twice as high compared to antibodies (except fluorescent conjugates).		
Working dilutions	Optimal dilution should be determined by the end user The following are guidelines only : - ELISA : 1/1 000 to 1/10 000 - Immunoblot : 1/200 to 1/2 000 - Immunocytochemistry : 1/50 to 1/200 - Immunohistochemistry : 1/50 to 1/200		

Packaging specifications

Packaging	1 ml
Appearance	Liquid
Constituents	PBS, 50% Glycerol
Preservative	None
Storage	Short term storage : +4°C Long term storage : -20°C
Recommendations	Product in glycerol, do not freeze

Product type

Secondary antibody

Clonality

Polyclonal Antibody

Related product
