

CUSTOM PEPTIDE SYNTHESIS

From Research to Discovery

FULLY CUSTOMIZED PEPTIDE

LENGTH from 3 to 90 amino acids.

QUANTITY from milligram to gram scale.

PURITY from bulk solution to > 98% purity

LARGE CHOICE OF MODIFICATIONS

OVER 150 AVAILABLE MODIFICATIONS

OVER 150 AVAILABLE SPECIAL RESIDUES

15 AVAILABLE RADIOISOTOPE-LABELLED RESIDUES

ADDITIONAL SERVICES

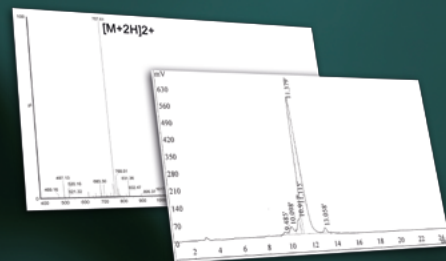

LABELLING WITH FLUOROCHROMES

CONJUGATION TO CARRIER PROTEINS (KLH, BSA, OVA)

Custom peptides are important tools in drug discovery and proteomic research. They can be used as antigens, enzymatic substrates and in many other ways.

Covalab has many years of experience in the field of custom peptide design and synthesis and provides high-quality peptides which may or may not include custom chemical modifications.

For each peptide, we provide:

- the lyophilized peptide.
- the analysis report, which includes HPLC and MS profiles
- the handling and storage recommendations.

Today we are able to provide more than 18,000 antibodies, and keep developing a wide range of immunological products, such as ELISA, ELISpot and Fluorospot kits as well as associated proteins, peptides and reagents.

From antibody design to the development of detection kits, our 20-year experience and know-how in antibody engineering allows us to provide you with a very wide range of services of high quality in immunotechnology.
